COVID-19 Guidelines for 2020/21

Please find the guidelines for the 2020-21 operating season at Cimarron Mountain Club. The intention is to provide the greatest margin of safety for our owners, guests and the CMC staff. We strive to operate with a priority on safety that gives us the greatest chance of remaining open and avoiding any closures during the upcoming season. These guidelines may be periodically revised. Upon revision you, will be notified via e-mail and the revised version will be posted on our website. We appreciate your understanding and cooperation.

- All owners and guests traveling to CMC must provide a pre-arrival negative COVID-19 test. The sample/test must be completed within 96 hours of arrival. These tests are available in pharmacies and doctors offices across the country. If you prefer the convenience of at-home testing, we suggest the use of dxterity. This product can be ordered at the link below and results are available 24-48 hours after the sample has been delivered back to the company. The negative test results must be declared to CMC management prior to arrival on property. Please, forward the negative test results for the entire party to the general manager before departing for your scheduled trip.
<https://dxterity.com/sars-cov-2-test-covid-19/#>
- Please do not travel to CMC if you have been exposed to a known COVID-19 positive case or if you have recently traveled to a hotspot of positive cases. Included in your pre-arrival packet, there will be a form for all guests to attest that they do not show any signs of illness nor have been exposed to a known case or hotspot. This includes, fever, cough, loss of taste or smell. Your negative test results will need to accompany the form.
- CMC staff will be tested weekly at a minimum via the dxterity testing process. If a team member tests positive, quarantine and a pause in operations will take place until it is possible to ensure safely re-opening the club. Creation of "a bubble" where staff remain on property with minimal contact in town and with others outside the CMC team will be implemented to the extent practicable.
- Group size and total number of owners and guests on property will be limited. Total guests on property not to exceed 21 at any given time. Each Owner Yurt can accommodate 6 total guests, the Caretakers Cabin can accommodate 9 guests. If all 3 of the owner accommodations are not booked during your stay, at management's discretion larger group sizes or use of multiple accommodations is possible. It is asked that owners with personal cabins abide by this rule for the winter season and include themselves in the total counts.
- Groups staying in the Caretakers Cabin will only be offered culinary services for lunch on the upper mountain. This is in order to maintain social distancing in Kitchen and Lounge Yurts. If all 3 owner accommodations are not booked, at management's discretion further culinary services may be approved on the upper mountain.
- Groups will be separated during all activities to avoid large numbers gathering in enclosed spaces. Each owner group will function as a pod. During transportation and skiing, separate snow cats or UTV's will be utilized. Dining will either be staggered or the use of multiple rooms with concurrent dining services will be used to allow social distancing.
- Upon arrival, all guests will have a temperature screening. If any guest shows 100F or higher, arrangements for departure will be made.
- Masks are required while indoors. This includes the communal yurts, UTV's and snowcats. While dining, please wear your mask when not at the table. All other standard COVID-19 practices will be adhered to and enforced.

Sincerely,

A handwritten signature in black ink that reads "Kristofer Noel".
